Our *Story*

FabFashion has stood at the heart of India's textile manufacturing tradition for over **50 years**, headquartered in Mumbai with a state-of-the-art weaving facility built for scale and precision. What began as a dedication to craftsmanship has grown into a trusted name among global fashion brands and garment exporters.

Our **60,000+ sq. ft.** facility runs on digitally controlled humidification and fogging systems, allowing us to weave diverse fibers and densities with absolute consistency — batch after batch, season after season.

Every metre that leaves our facility carries the same promise: reliable delivery, exacting quality control, and a partnership built on trust. From auto-loom cotton fabrics to custom weaves engineered to your exact specification, FabFashion brings five decades of expertise to every order.
